

ECHO 19 AUDIO PRESENTS:

F/A-18C HORNET AUDIO OVERHAUL FOR DCS: WORLD

V3.10

OVERVIEW

Thanks for downloading the Echo 19 Audio Overhaul for the DCS: F/A-18C Hornet! We are so happy that you also share an affinity for great sounding airplanes and appreciate your support!

This mod aims to enhance the already stunning F/A-18C Hornet that was produced and developed by Eagle Dynamics. A painstaking amount of time, energy and resources were poured into this mod and would appreciate any donation you can make to help us continue making these products! Any amount is helpful. You can donate easily via PayPal here:

CREDITS

Special thanks and shout-out to the following companies and individuals for helping make this mod a reality!

- Eagle Dynamics | Original SDEF values, F/A-18C Hornet
- Jake Green (JBomb) | Testing, Critiques, Support
- Kyle (Airshow Addict on YouTube) | Additional Sounds
- Capt. Haze | Testing, Support
- The official feedback team @ Discord
- Wright Patterson AFB – LCMC
- Battle Creek Air National Guard Base

EQUIPMENT / SOFTWARE

Wondering what gear it took to produce this? Here's a list of stuff we used!

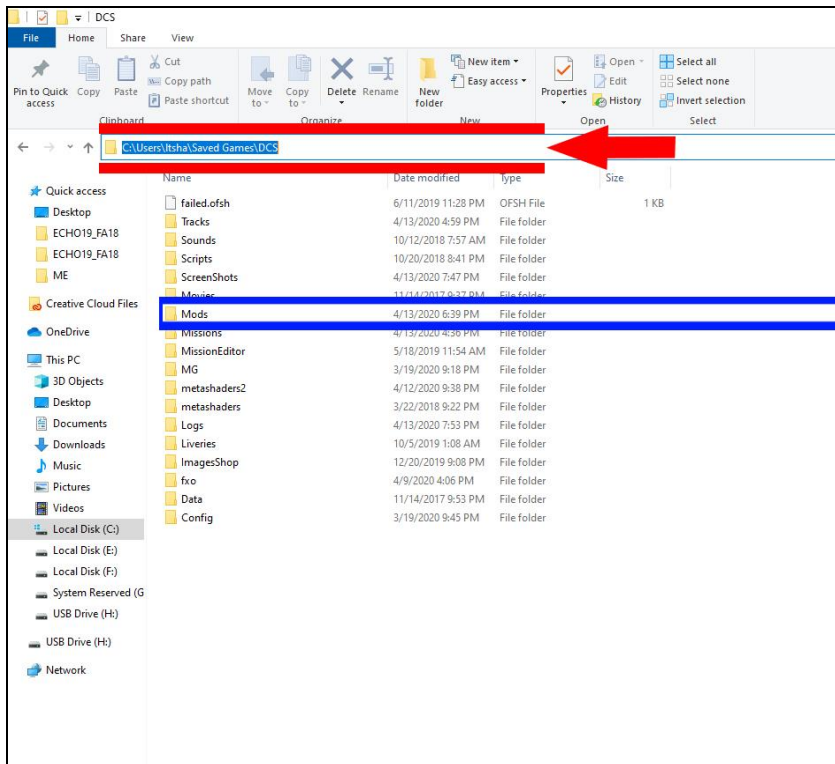

- ZOOM H6
- TASCAM DR40
- SHURE SM57
- SENNHEISER MKE 600
- PANASONIC LUMIX GX8 (video reference)
- LOGIC PRO X
- ADOBE AUDITION
- AUDACITY
- ATOM (text editor)
- NOTEPAD ++
- ADOBE PREMIER

SETUP / INSTALLATION

Here's how you install the mod – if you've never installed ANY mods before, start here at Step 1. *If your mods folder is already set-up, skip to step 2.*

Step 1:

Navigate to your DCS "Saved Games" folder. Usually, this is located by following a similar path as this: C:\Users\your_username\Saved Games\DCS.

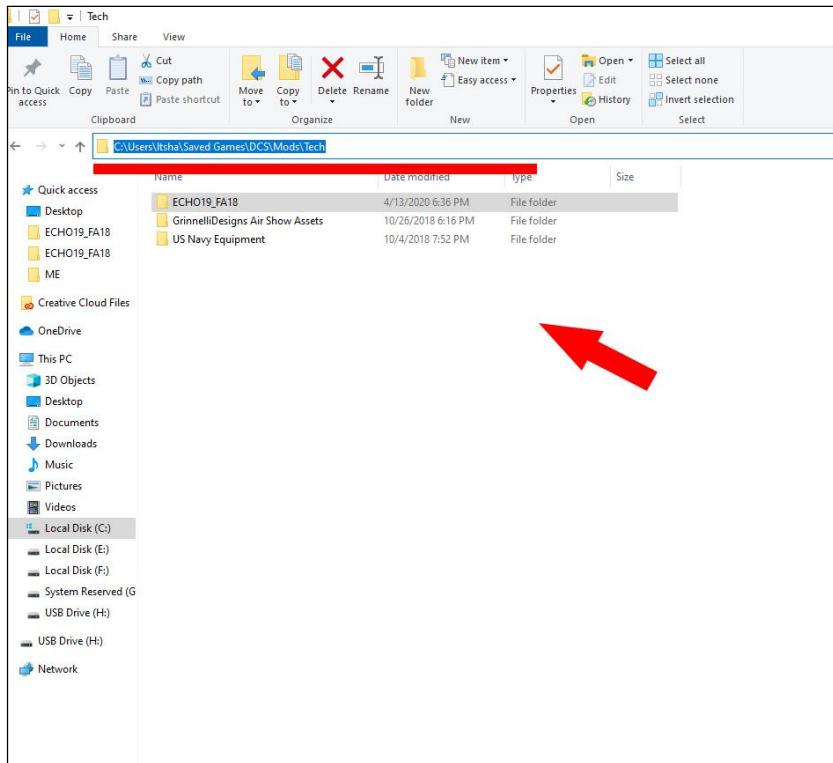

Create a new folder in this directory and name it "Mods". Now, inside your new "Mods" folder; create a folder inside it and name that one "Tech".

Proceed to Step 2 on the next page....

SETUP / INSTALLATION – CONTINUED

Step 2:

Once you’ve created a “Tech” folder inside your DCS Mods directory, all you need to do is drag the ECHO 19 Audio mod folder into the “Tech” folder – as seen below.

Simply start up your game, and you should see the appropriate Echo 19 icon on your Modules dashboard, indicating the mod has loaded.

Note: If you experience issues with installation, please visit our Discord or post a response on the ED Forum thread. Someone will be glad to assist you!

END-USER LICENSE AGREEMENT

It takes a lot of time, energy and resources to produce this kind of content, and here at Echo 19, we take our work very seriously. As such, we would like to spell out a few things for legal purposes – to protect our work. While this mod specifically is labeled as “Freeware”, we do not want our work being modified and/or re-distributed through other parties without consent. This generally doesn’t concern the normal, every-day, user. You can find this document in the “Docs” folder of the modification. Thanks for supporting our cause!
